Title of the Programme:

Development of Digital Educational Content based on NCERT learning outcomes in Jaunsari dialect for the students of Class 2nd and non-jaunsari teachers of govt. primary schools of Jaunsar region(Chakrata and Kalsi blocks) of Dehradun district.

Objectives of the programme:
- The students will be able to learn languages better and thereby enhance overall performance of students in school subjects.
- Teachers will build their capacity in Jaunsari dialect (must for foundational literacy) and thereby will be able to communicate better with students in their mother tongue.
- The animated content will generate more interest towards teaching learning process.
- It will promote local (Jaunsari) language and integrate it with technology and digital platform.

Modalities of Implementation:
- Jaunsari educational content developed for class 2nd(poems/rhymes, stories etc.) and will be transacted through the appropriate methodology in digital form(animation/podcast/video).
- Audio recorded for developed educational material.
- Subtitles in hindi developed
- Appropriate animation for the content is in process and after that it will be made digitally accessible to all.

Expected Outcomes the programme:
Teachers and students will be able to communicate better and thereby enhance overall performance of students in school.
