# Call for Content Experts and Mentors:

SCERT Uttarakhand Hackathon 2024-25

SCERT Uttarakhand is thrilled to announce the launch of **Level-1** of our Hackathon series, which is focused on fostering innovative **digital solutions**. We are seeking **AI, coding, programming, robotics (ML), and STEM experts** to contribute their knowledge in creating story-based content and exemplar ideas. These resources will mentor teachers and students in developing cutting-edge solutions to real-world societal challenges.

- As a content expert and mentor, you will play a vital role in guiding participants toward leveraging **technology-driven solutions**, including AI,

coding, robotics, and programming, to address key issues. We invite you to select **2-3 topics** from the list below that align with your expertise.

- All content writers are expected to ethically use technology and content or any other information available on the Internet or anywhere. (citation, references, and copyright)

What you'll do: (Idea Building to solution using AI and IoT or digital solutions)

- Local to global solution for any existing problem in education like teaching and learning material, assessment, examination, office management, e-content material for student and teacher, environmental issues, or SDG listed by UNO
- Write engaging, **STEM-based content** with a focus on AI, coding, robotics, or other emerging technologies.
- Provide **exemplary project ideas** and real-world applications for innovative digital solutions.
- Mentor teachers and students during the Hackathon, helping them turn their concepts into impactful projects.
- There will be an honorarium for the content writers and mentorship.
